- Turnkey Projects
- Electrical Power Optimizations Systems
- Preventive & Corrective Maintenance
- Services Annual Maintenance
- **SRS SAFE™** Earthing Solutions
- V-SAT Protection (Monkey) Cage
- LAN Structured Cabling design and installation

Making Safe Connections

...has been the underlying driving spirit of all professionals at **SRSINDIA Technicals Pvt. Ltd.** Technicians are specially trained to provide ultimate safety standards to the customers keeping in mind the latest trends in electrical designs.

TURNKEY PROJECTS

With our vast experience in handling jobs up to 33KV/5MVA we prepare complete electrical layouts, drawings & designs for industrial, commercial & residential wiring. We undertake contract jobs on turnkey basis, which includes supply, erection, testing & commissioning of transformer, switchgear, cables, LT/HT panels & lighting fixtures etc. We do complete HT and LT installation projects with all type of internal wiring. We design & execute the low voltage security system i.e. access control doors, fire alarm and fire detection system, CCTV, public address system as well as for data, voice and networking system.

We also undertake annual maintenance contract. We suggest tariff change and means of conserving energy to reduce the electricity bills to the maximum possible extent.

We give our clients the latest state-of-the-art technology and hassle free maintenance in future. Our strength is to provide best material & services suited to the customer's budget without compromising on quality & prescribed standards.

SAVING THROUGH POWER QUALITY

We offer comprehensive electrical measurement and evaluation of your facilities distribution system. By conducting energy audit, we suggest ways to improve power factor and controlling harmonics thereby maintaining the power quality resulting in less wear and tear of electrical equipment and increase in machine's output efficiency thus rise in production in lesser time. The above exercise results in reduction of electricity usage by cutting out impurities net wastage at all points.

We review your facility's electrical layout and perform thorough electrical measurements and testing of distribution parameters using state-of-the-art power analyzer. Our engineers, with the aid of the latest software will analyze your data & information and prepare a comprehensive report for your review and evaluation which will identify your facility's existing inefficiencies.

SRS Safe™ GEL EARTHING SOLUTIONS

Traditional method of earthing does not have clearly defined parameters to give the results. **SRS Safe™** Gel Earthing Electrode was introduced to solve this problem in the year 2005. It has since proven the worth with thousands of satisfied customers. A special chemical called Back-Fill compound is used which makes it fit-and-forget and MAINTENANCE FREE earthing.

This eco-friendly product fulfills the norms of BIS 3043-1987.

V-SAT PROTECTION CAGE

We are the largest manufacturer of antenna cage in India. We are proud to our stringent quality control for which we often receive appreciation in form of repeated order from our valued clients.

LAN CABLING

We provide end-to-end structured cabling design and installation services for offices and apartments which are governed by set of standards enabling a trouble free voice and data communication, including video conferencing, using CAT5E, CAT6, CAT6A and CAT7 cables and modular sockets.
